

Polzeath class - optional home learning ideas

Autumn term - Settlements and Living things and their habitats

Our first Year 4 geography topic is Settlements. Alongside that we will also be learning about Living things and their habitats in science. If your child would like to complete a home learning challenge about either topic I would love to see their work. I have listed some ideas below however, if your child would like to show their knowledge in a different way, please encourage them to do so. This is optional learning and there is no pressure to complete any task.

<p>Create your very own 3D model of a settlement - village, town or city.</p>	<p>Create a piece of art showing the skyline of a city.</p>	<p>Design your own lego house that can become part of a lego village or town.</p>	<p>Research your favourite animal and compile a fact file about it.</p>
<p>Design a poster showing the natural habitat of a mammal of your choice.</p>	<p>Write a poem about your favourite animal and where they live.</p>	<p>Research and create a fact file about a settlement - a village where you live, a town you know about or a city of your choice.</p>	<p>Create a poster about what makes a living thing a living thing. MRS GREN may help.</p>
<p>Find out how Rock developed and grew.</p>	<p>Your choice - be creative and show your learning in a way that you choose.</p>	<p>Design your own creature and explain the habitat it needs to survive in.</p>	<p>Find out about a reptile, mammal, bird, amphibian or insect and create a diorama of their habitat.</p>
